## PULSAFEEDER STARTUP POLICY

In order to make a component and/or system startup efficient and effective, scheduling of the startup is dependent on the following timeline:

### Preliminary Scheduling

- Minimum of 6 weeks advanced notice of requested startup date
- Pulsafeeder will “Pencil-In” the startup based on availability around the requested date
- Pulsafeeder will provide the Pre-Startup Checklist to the customer to complete

### Three (3) Weeks Prior

- Customer to submit the completed Pre-Startup Checklists to Pulsafeeder for review
- Customer to submit a complete set of digital photo’s showing the component(s) and/or system(s) installation

### After Pulsafeeder Review

- Pulsafeeder to work with customer for any “open items”
- Once closed, Pulsafeeder to “Pen-In” (finalize) the startup schedule

Pulsafeeder’s expectation is that the installation is complete and ready for startup upon arrival. If Pulsafeeder discovers that the installation is not ready for startup, the service tech and/or representative reserves the right to leave the site and re-schedule the startup **after** installation has been verified to be completed. In addition, the customer will be billed for the following:

- Fee: \$1,250 (domestic) or \$2,500 (international)
- All travel and related expenses incurred for the original startup date.
